

Welcome to CWK IT Consulting GmbH!

For more than 20 years, our multi-disciplinary and international team of computer scientists, industrial engineers, scientists and humanists develops customized and innovative software solutions. Multinationals as well as medium-sized companies rank among our customers.

For the extension of our team, we are looking for you, a talented

Software Developer (m/f)

focus: web technologies

What you'll do

- Independent development and implementation of web-based applications
- Contribution to project-specific software architectures
- Analysis, design and implementation of tailored software solutions in close cooperation with our customers
- Quality assurance, testing, bug fixing
- Whether in customer projects or in exchange with colleagues:
We are looking forward to fresh ideas and new solutions!

Who you are

- Bachelor's degree in computer science or equivalent
- Several years' experience as a software developer is desirable
- Deep experiences in web development (Java) and Java Frameworks
- Good Knowledge of web technologies and SQL
- Experience with relational databases would be an advantage
- Ability to work independently, well-structured and result driven
- Enthusiasm and team spirit
- Good German language skills (spoken and written)

What we offer

Use your opportunity to work in a well-established company with demanding and varied tasks and projects. At CWK, you will find a cooperative working atmosphere with short decision-making paths and a great deal of creative freedom. As we always work with state-of-the-art and leading technologies, the know-how of our personnel is of great importance to us. Targeted trainings and further education are therefore integral factors of our corporate policy. An attractive salary, transparently linked to your personal performance and development is a given.
